

senseFly Corridor

Linear Mapping Kit

senseFly
Parrot Group

The senseFly Corridor is a combined senseFly S.O.D.A./eMotion software solution that makes corridor mapping easy.

With its portrait camera position, senseFly Corridor requires 30% fewer images to map the same linear route. This, in turn, means 30% shorter processing times.

| | |
|------------------------------|---|
| Sensor | 1" |
| RGB lens | F/2.8-11, 10.6 mm (35 mm equivalent: 29 mm) |
| RGB resolution | 5,472 x 3,648 px (3:2) |
| Exposure compensation | ±2.0 (1/3 increments) |
| RGB shutter | Global Shutter 1/30 – 1/2000s |
